

**What is claimed and desired to be secured by Letters Patent is as follows:**

1. A bottle containment and identifier unit comprising:

a container having a cavity and a peripheral lip;

a lid sealably mounted onto said lip and having at least one aperture bored through said lid;

and

at least one bottle identifier being attached to said lid.

2. The bottle containment unit as recited in claim 2, wherein said at least one bottle identifier being secured to said container.

3. The bottle containment unit as recited in claim 1, wherein said bottle identifier being adjacently positioned to said aperture.

4. The bottle containment unit as recited in claim 1, further comprising clear material positioned over each of said bottle identifier thereby preventing said identifier from peeling off.

5. The bottle containment unit as recited in claim 1, wherein said cavity having a depth capable of storing items therein.

6. The bottle containment unit as recited in claim 1, wherein each of said apertures having a diameter capable of preventing departure of a bottle therefrom.

7. The bottle containment unit as recited in claim 1, wherein said bottle identifier is a Velcro™ couplet where a first portion of said couplet is affixed to said lid and said second portion of said couplet is attached to said first portion.

5 8. The bottle containment unit as recited in claim 1, wherein said bottle identifier is a Velcro™ couplet where a first portion of said couplet is affixed to said container and said second portion of said couplet is attached to said first portion.

9. The bottle containment unit as recited in claim 1, wherein said lid is made of clear plastic allowing a user to view contents stored within said container.

10. The bottle containment unit as recited in claim 1, wherein said container is made of clear plastic allowing a user to view contents stored therein.

15 11. The bottle containment unit as recited in claim 1, further comprising at least one handle positioned on said container.

12. The bottle containment unit as recited in claim 1, further comprising multiple handles positioned on opposing walls of said container.

20 13. The bottle containment unit as recited in claim 1, further comprising a strap having two ends, each end interlockingly fitted to each of said handles.
